One American News Network is very informative, and it presents the facts in an easy to understand format.

TV like this deserves to be shared with the largest audience possible.

Please ensure that programs like this see the "light of day", and that large organizations such as Time Warner Cable, Charter Communications, etc. must give them a chance to be viewed.

They must be required to produce a variety of programs, even if those programs do not agree with management's political orientation.

Please insist that variety be required for them to receive FCC approval.

FCC usually does a great job; thank you for all you do.
