RE: MB Docket No. 15-149

Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

The East Parker County Chamber of Commerce wishes to extend its support for the proposed cable broadband company New Charter. Our chamber works to encourage economic growth in our community. We rely on our members and other partners to invest in our region's future. We believe New Charter would benefit our members through a commitment to the latest technology and affordable prices.

New Charter would bring together Charter Communications, Time Warner Cable and Bright House Networks. The merger proposal shows clearly how New Charter would adopt the best products and practices of each company, assuring customers would gain from a tested and winning formula.

New Charter would appeal to consumers of all needs. It would provide a variety of broadband speeds so customers can choose the right fit for their business or home. New Charter would provide high-quality streaming from fiber-optic networks where available. It understands the benefit of this technology, and would invest in commercial and residential networks in order to bring it to more customers. New Charter would also invest in in-home and out-of-home WiFi hotspots so that customers could take their reliable connection with them on the go. Each of these products would help businesses to function efficiently and encourage greater investment.

We are pleased to support New Charter and believe it would benefit all our members. We ask that you approve the merger.

Sincerely,

Lisa Flowers, CCE, IOM
President
