Do we really need a mega merger the answer to that is NO. Do I want Charter as my cable provider as a Time Warner cable customer since 1980 their the only cable, internet and phone service I have to chose from answer to that is NO. Do I want all of my private account with my ss number , name, address, my password, so much more sensitive provide information to be transferred to Charter in a blink of an eye they have the right to that NO. Consumer protection laws of privacy must prevail. Very cruel to have a mega company not fair the smaller telecom companies. Charter prices are to high I think Time Warner cable customers had no chance or voice over this awful mega merger we got kicked in the butt instead. I say no mega merger and No to Charter. No No No
