I am opposed to the merger of Charter Communications, Inc. and Time Warner Cable, Inc. and Bright House Networks. We do not need another large conglomerate that may have the power to limit the consumer's right of free access to all views, even those of independent programming services such as One American News, etc. It seems to me that the more we allow powerful information conglomerates to control our information, the more we allow the eroding of the freedoms of all our citizens. I thought that the FCC is supposed to protect all of us from the danger of monopolies, not to help promote them.
