I propose the OANN channel to be available on any TV program available in Texas, due to News content and reduced partisan tendency (mostly only News) in politics and the accessibility to International news. I also propose to be included in basic channels for Texas available to those who are not able to pay for high price of cables, replacing one of many Spanish-Mexican channels because we need all Texans to be citizens of the US, not of Mexico. We need American- Mexicans who could be well informed when they cannot pay high cost of cable. I am the single one from my family able to pay for cable. Many are paying only for Internet, but basic channels will create informed citizens and I'm sure , they will really enjoy OANN.
