To Whom It May Concern:

The proposed merger of Charter should include One America News Network, an independent station that provides history, nationwide and world news. This "niche" small independent provides more news than any other large station, as well as weather and even recalls.

One America News Network (OANN) should be part and parcel of the proposed merger, or the merger should be rejected.

There are too many larger mergers that have destroyed competition and this continues to negatively impact consumers. Consumers hunger for more honest news with local and world wide breaking news and OANN is a jewel not to be treated unfairly, discounted, or cast aside as this merger is being considered. Snippets of Historical data keeps consumers cognizant of how events have shaped news of today, and further, the news presented is not just "recycled" cable news. This family-owned network has earned my patronage above all other super networks because of the saturation of real news without commentary and articulate delivery. America continues to thrive as a result of smaller family-owned businesses.

Sincerely,

Cheryl Onorato
