We have no media outlets that report news. The only outlets provided in this agreement reflect only the views of the corporations that back them. Media factions like Fox News and MSNBC are news fabricators and leaders in misinformation and divisiveness. This is an issue that polarizes the country socially, contributes to widespread unrest, and undermines their duties as a news organization to provide competent information to the viewer. One America News should be added to the lineup and I urge the FCC and charter/timewarner to look into more independent information outlets to bolster this deal to the advantage of WE THE PEOPLE as well before promoting more monopolizing of media.
