I am asking the FCC to be independent and honest with its consideration of the merger of Charter Communications buying Time Warner Cable and Bright House Networks. I am concerned as should the FCC be on the financial (bankruptcies) performance and the unfavorable history of anti-competitive term toward independent programmers of Charter Communications and their position to flatly refusing to carry One American News Network. I am asking the FCC to have family owned and independent programming networks to be treated fairly and equally as the major networks. I believe the public should be able have a choice of receiving true, honest, and unbiased news from One American News as compared to the slanted news from the major networks as part of this merger.
