If OAN news is not carried with the merger of Time Warner and Charter then the merger should not be allowed. It is important to have alternative news outlets for different viewpoints in this country. It is suppression of freedom of speech to have the corporate giants own and control all the media outlets and news organizations. It amounts to censorship to have only certain news reported or not reported at all and to have the news reported slanted towards certain viewpoints that must always be in line with the corporate owners and their political agenda. Thank You.
