

60001356853.txt

I am in support of the proposed changes to the Wireless Emergency Alerts system, including the increase in message characters from 90 to 360, and the creation of a Local Emergency Government Information category. This will allow local Emergency Managers to better serve our communities, and will improve our public warning capabilities without adding significant costs to the taxpayer. Of particular importance is a resource that will help us to improve our warning capabilities to the deaf, blind and non-English speaking populations. I would encourage creation of both a text and an audio capability for warning messages that will help to serve non-sighted and non-hearing populations. Thank you for your time and consideration in this matter. Sincerely, Kristin Card, Chemung County, NY Office of Fire and Emergency Management
