RE: MB Docket No. 15-149

Tom Wheeler  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Wheeler,

Communities in Schools of the Dallas Region, Inc. (CISDR) is concerned with the limitations of traditional schools to reach students that need specialty support. We work to unlock the potential of students that without help may not succeed in school. Our integrated academic support reaches more than 9,000 students in 77 schools, in 5 counties, and we appreciate the collaboration and support we receive from schools and sponsors.

We are pleased to announce our support for the proposed cable broadband company New Charter. We believe the company would combine only the best of Charter Communications, Time Warner Cable and Bright House Networks, allowing customers to benefit from the latest innovations and a commitment to local development. Time Warner Cable has been a great community partner to CISDR, supporting our Girls Exploring Math and Science project. We are also encouraged by the previous work of Charter and Bright House Networks, and believe together the companies would have a major impact on underserved communities.

New Charter would assist our efforts through its low-income program. The initiative would provide high-quality broadband to households at a reduced rate. Many of our students come from low-income backgrounds, and we know broadband access at home would be a great asset. We respectfully ask for support of initiatives that seek to improve the lives of underprivileged youth and approve New Charter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Judith Allen Bazemore".

Judith Allen Bazemore, PsyD  
President & CEO, Communities in Schools of the Dallas Region, Inc.
