District 11 Councilman

Scott W. Harrington
Legislative Assistant

RE: MB Docket No. 15-149

Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

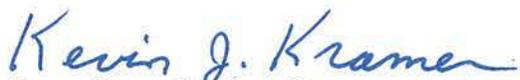

On behalf of my colleagues on the Louisville Metro Council, I write today in support of New Charter, the merger of Charter Communications with Time Warner Cable and Bright House Networks. On October 22, 2015 the Metro Council voted in support of New Charter's promise to offer better connectivity with higher speeds and enhanced customer service.

Both Charter Communications and Time Warner Cable have successfully served the Louisville community and each employ around 1,000 people here. We look forward to a continued partnership with New Charter and the benefits that advanced technologies and services this merger will bring.

I serve as the Metro Council's representative to the National League of Cities, where I have served in a leadership position on the technology committee. One of the responsibilities of city government is to ensure we are providing a welcoming business environment and that we have the services companies need to grow and thrive. My goal is to recruit the best and the brightest to Louisville, and I believe the services offered by New Charter will certainly help us achieve that goal.

From their commitment to American jobs to their offering of high speeds at affordable rates, I know New Charter will serve our community well. I fully lend my support to this merger, and look forward to working with New Charter.

Sincerely,

Councilman Kevin J. Kramer
Metro Council District 11, Louisville, Kentucky
