One America News must be allowed to be aired after the merger of Charter Communications and Time Warner. Having independent and non-biased news is fundamental to the people of this great America. We must continue to be able to hear both side of the news and not just what a few networks want us to hear. Let us make up our own minds and not be biased by someone else's views.

I am opposed to this merger if it means small independent news agencies are not allowed to air their programming on these cable networks.
