To Whom It May Concern:

We are a non-profit religious organization attempting to broadcast our programming on digital sub-channel 54.3. We have been asked by the station to petition for an exemption for close captioning through the FCC. We don't have any commercial content in our programming. All of the programming is religious preaching with some live taping of church services. We don't have the financial support to be able to afford the cost of close captioning.

The station is requesting a case number or an exemption number indicating that we have started the process of petitioning for an exemption.

We don't know what more we need to provide to you in an effort to get this petition approved. Any help and guidance on how to obtain the above will be greatly appreciated.

Thank you.
