As dedicated Christians living in Medford, Oregon, we are concerned about the future of the many Christian low power television broadcast stations positively influencing our nation and our hometown. Our local LPTV station must be protected. As Christian, we are concerned that any loss of LPTV service will mean a reduction in the availability of broadcast content that brings hope and positive values to our daily life. We believe the Christian message is important because our country needs Christian values. Most often, the cable and network television channels fail to represent my Christian values in their content. We want the future of Christian TV broadcasting to be protected because it is very important to us as a Christian nation. Please do not permit Christian voices to be silenced through the loss of LPTV stations as a result of the planned auction or repack. Low-power TV stations that have operated in good faith and have complied with their license should be protected and kept on the air.

Our names are Harold and Sue Steward. The FCC forced us to purchase a new television set based on the promise of more free over-the-air channels. Do not shut down my local LPTV station. We want more free channels, not less. Low-power TV stations that have operated in good faith and have complied with their license should be protected and kept on the air.

We appreciate the opportunity to watch free over-the-air television made available through low power television stations. We have come to understand that the FCC may make spectrum available to be auctioned, and some LPTV broadcasters may be forced off the air. The FCC must protect our local LPTV station. There are programs that our family enjoys. Free TV is safe TV. Many Cable programs are not safe for my family to watch. Some shows we enjoy are only available to us over-the-air through our local LPTV station. I should not be forced to pay for cable, satellite or fiber to watch TV. There are now many free TV stations available with a simple antenna. Please do not take any of those free stations away. We are senior adults and do not have cable TV nor do we want to have to subscribe to cable which would affect our monthly budget. Low-power TV stations that have operated in good faith and have complied with their license should be protected and kept on the air.
