The internet should be free to all Americans regardless of income or state of residency. The internet also needs to be free of constraints, ie, no problems between non-competing internet providers. Americans need to have access to internet that IS NOT based on whether or not they can PAY for it, or higher speed access, but as a matter of RIGHT. It is simply RIGHT for ALL internet providers to PROVIDE INTERNET to consumers REGARDLESS of the ability to pay PREMIUMS for higher speeds or better service.
