To: Mr. Wheeler, I oppose this deal with Charter why? Time Warner Cable customers accounts were hacked into mine was one of them. These scammers stole my phone number and my sensitive information on my account. My caller ID landline phone came up with my phone number I answered the call it was a scammer. That is how easy it is for hackers to steal not only my number but my account as well and not to mention my financial information which they used as well. Can As a proud Time Warner cable customer since 1975 can Charter be hack free NO. I looked at Charter prices for there services are higher then Time Warner Cable. It only cost \$7.00 a month for internet so cable companies are making money. No to Charter. Keep Time Warner Cable. They empl oyee the most American workers. Thank you.
