

Request of the FCC

Please accept this request to the FCC to technically dis-allow phone number spoofing. I understand the desire for law enforcement and potentially abuse victims to be desirous of this capability, but their desires could be handled by 'caller-id blocked'. I can see no good reason for spoofing to be allowed.

Spoofing has now become the illegal telemarketers and scammers method of avoiding detection / prosecution for illegal usage of our nations communications networks.

Citizens are no longer able to detect nor file complaints against illegal operations, as there is no trackable identification.

Feel free to call me with questions.
