To whom it may concern,

In the ever growing presence of "big money" groups, individuals and corporations we Americans are now more aware than ever before in history that our voices are consistantly ignored. This is not only unacceptable but goes against the very fabric of our great nation. Our founding fathers wrote the Constitution and Bill of Rights for this reason and to maintain power to the people, NOT the "elite". The obvious fact is that most news outlets are untruthful (outright dishonest) and serve their own agendas/investors not "We the People"so where does this end?

We have been awakened and enlightened by the ability to see, talk and hear the truth by the Internet and we hold our founding documents to be sacred. So we absolutely demand that monopolies and big money not be able to censor us in any way. We have allowed our Government to gain power in ways that has seemingly damaged our ability to control our countries fate and this is one instance you can show us that you truly REPRESENT us instead of acting like you rule over us.

That said, we demand action by you to stop mega mergers from censoring the truth and serving themselves. One America News seems to share our concerns and to providing news service that is honest. We support and need news agencies like them and I believe it is the start of transforming news agencies back to what they started out as, a PUBLIC SERVICE.

Remember that you all are elected by us as representatives for us. Our Nation is at a very serious crossroad which is that We the People are standing up, once again, for the foundation of the greatest nation on Earth. The United States of America. Millions have died for this country, millions serve everyday and millions work to support our way of life. So you elected few must represent us, the majority correctly, fairly and honestly. With Honor.

Thank you for your time and immediate action to our concerns. We are counting on you and we are watching to see who really serves the public vs serving their own interests and bank accounts.

Sincerel y,
James Fuller and family
