To the FCC,

This is my second email regarding the issue of Charter/Time Warner and the other major News/Television networks whom have, for way too long, controlled the Industry and in OUR opinion, censored the news to the public in order to serve their own special interests, opinions and large companies that pay them. This is not only against the Constitution of our great Nation but down right illegal as I understand monopolies are illegal. I remember Microsoft having to sell off some of their interests because it formed some sort of monopoly (which I admit I am not educated on) but this concept of stopping and regulating monopolies is cohesive to our Constitution and common sense.

We demand fair practices in public service, including industries that make their money performing works that affect and inform the general public. We need you, our elected PUBLIC SERVANTS to be our voice as intended. We need you to enforce our Constitution, best interests and make the companies that act as though they write their own laws behave as the public servants they are and STOP violating the public trust.

We appreciate your service and prompt attention to this matter. Make One America News be recognized by these people and allow them to continue providing the public service we deserve and maybe even begin to rebuild the public trust that has been trampled by the large companies that have disregarded our foundation for so long.

Sincerely and Patriotically,

James Fuller
