REPLY TO PETITION FOR RECONSIDERATION

Lectrosonics, Inc.¹ hereby responds to a Petition for Reconsideration filed in the above captioned proceedings by Sennheiser Electronic Corporation.

In this Petition Sennheiser points out that the four center frequencies selected for 200 kHz emissions in the 169-172 MHz Band are not coordinated to be intermodulation (IM) free. We agree with Sennheiser that these new wideband channels will suffer from IM problems as a result. We are in favor of Sennheiser’s suggestion to shift some of the frequency pairs to correct this situation.

Respectfully submitted,

Gordon Moore
President

Robert Cunnings
Vice President, Engineering
