To Whom It May Concern:

Each morning I watch the news in my office. I find it difficult to watch regular network news as it is very stilted in the direction the network wants the viewer to lean. Please block the pending request being considered to merger Charter Cable with Time Warner Cable and Bright House Networks. Having had personal experience with Charter Cable it is my honest opinion that Charter does not have any respect for their customers! The only time that I have seen Charter take an active interest in their customer is when the payment of the bill is late then they want it paid now! Isn't our country made strong partly because of the Free Market? I remember when the Bell monopoly was broken up because there was no competition so why would you even consider allowing Charter to present such an idea for consideration?
