

I watch RFDTV because of its related educational quality to my family's live, along with many of our many rural and urban lives. This country is hurting for good programs, as healthcare is one that has not worked well. Taking away independent channels such as RFDTV is just anther slap in the face as we have seen with big financial houses, communication companies and government in part. It's greatly appreciated for the FCC to look into if independent channels are being discriminated against. Please help us!
