

RFD is a great choice for good family viewing and should be available as standard cable viewing package to **all cable subscribers**. I watch RFD TV on Charter Cable but have to pay extra fees to allow me to view RFD TV.

It is critical that urban viewers have RFD TV available to them so they can realize all the agricultural community has to be aware of to realize a good profit on their agricultural sales.

The exceptional family viewing is great. It is down to earth sensible programming that is educational and fun to watch.

The shows I love are the music shows, the tractor pulls, the up to date market reports, the national weather and crop reports and the agricultural news reports. The antique tractor and equipment shows, the agricultural equipment auction sales reports, and the show called American Harvest.

I normally do not watch any other station at all.
