I watch RFD frequently on Direct TV. Watching that channel is very important to me. I live in AR but have lived and worked in many major cities and traveled to other countries. We enjoy the music on that channel and love such programs such as "Postcards from Nebraska" and "Texas Country Reporter". I loved programs that share the awesome people, who live in our country. I cannot understand how some want to drop independent programming. We need a balance in what we are able to watch. The cost of watching TV is high and yet we are given poor choices. Often it is old movies and reality TV that is not truly reality. It is only fake after a short time. Please give all Americans a choice of what is available to watch in free time.
