It is beyond belief that Verizon FiOS dropped RFDTV from its programming and in doing so they seem to have developed a pattern of dropping rural/independent programming from their lineup. I, like so many other people, depend on this type of programming! It appears that they are only offering the public what VERIZON wants the public to watch and not what the public WANTS!

Verizon should offer their paying customers what they would like to pay for and not offer a lot of ?garbage? programming and giving us no option, other than the remote control.

It is my wish that Verizon FIOS would reinstate the RFDTV programming to their schedule!
