Per the referenced subject: I am in full support of a lifetime amateur radio license issued to current license holders in good standing of all levels of operating privilege's and any person who passes the license exam from the date in which the rule is enacted by the FCC. The burden on the FCC of record keeping and maintaining multiple databases would be removed. One database would contain all licensed amateur radio operators and be less cost to both the FCC and the amateur radio community.

Respectfully Submitted,
CAPT Blane Wilson, USN, RET
