Comment: This proposed rule should be adopted so that people that are deaf or hard of hearing can easily find the closed captioning options on their television menus. As a young adult, I have also struggled finding the closed caption options on some televisions and any way to make this easier would greatly help those that need it. I believe the TCDA does give the Commission the authority to adopt these regulations because the Act allows the Commission to take actions that it deems appropriate to keep closed captioning available to consumers. This proposed rule could be deemed appropriate by the Commission because if closed captioning menus are too complicated to find, then they are not available to consumers. I think the closed captioning option should be on the first menu that a consumer could find and the settings should be easy to navigate and change.
