I am very disappointed that my cable carrier, Verizon FIOS has talked RFD-TV off its programming. This station is one of the few that I and my grandchildren can watch without listening to profanity or viewing vulgarity. The programming on RFD-TV is wholesome and entertaining. I am so tired of cable providers taking away programming that is part of my "package", but not reducing my cost and adding programming I did not request or want AND increasing my cost. I would to see a system where the customer can choose each station they want in their package from a smorgasbord of programs.
