RM-11760 Petition For Proposed Changes Changes in 47 CFR Part 97.25 License Term for Amateur Radio

I support this change in the rules to change the license grant period from every 10 years to a lifetime of the license holder, similar to what was done to the GROL, a commercial FCC license. The reduction of paperwork and resources to administer the paperwork would benefit the FCC, because they would spend less time on that administrative tasks and could reutilize those resources towards increasing enforcement activities.
