Count me as one of those who greatly appreciated the RFDTV channel on Verizon's FiOS cable network. Since RFDTV was dropped by FiOS, I've had to find RFDTV content by becoming a member of the RFDTV Country Club at a cost of \$90 per year for streaming of the RFDTV broadcast. I no longer have the ability to program the RFDTV shows for later viewing. The FiOS dvr set top box still costs me nearly \$20 per month but I can't include RFDTV shows any longer.

Ironically, I had to pay extra per month to get RFDTV on FiOS because it was included in an illogical bundle only and not available as a single entity. So I'm still paying for the otherwise-unwanted-bundle but denied access to RFDTV on Verizon FiOS.

Would be most grateful If you were to require Verizon to reinstate RFDTV on FiOS.
