I am writing to complain about verizon dropping RFD\_TV from their programming. RFD-TV has a menu of programs that I enjoy watching that is entertaining and gives me valuable information for my farming operation. No other channel including public television of which I am supporter carries the mix of topics that RFD-TV.

There is a need to keep independent broadcasting alive in this country instead of allowing Wall Street to dictate everything. Verizon is making a lot of money.

Comcast tried the same thing last year. Their service is poor so I am not going to switch to them. Somebody from a company that will go unnamed cut our FIOS cable out by the pole. The Verizon serviceman said the cable is too tough to normally cut through with a weed wacker. Go figure.
