This is my chance to tell the FCC what RFD-TV means to me. Why it is important that the public have choices for independent programming on television. Please protect independent programmers. Please have RFD HD be offered on DIRECTV as well as other cable and satellite companies. Independent programming, like RFD-TV, should be offered in the most economical cable package, and not put on some expensive tier where the customer has to pay more. Urban based media giants should not block rural content from being distributed due to their own bias. There are many of us that live in the country and we get so much valuable information from this programmer.
