FCC needs to work for the people, not corporations. We need independent programming, especially in the news department, where so much is controlled by big corporation's personnel interest, forcing their opinion as fact and leaving out much of the truth. One American News gives so much more of truth and facts, treating their viewers with respect, letting us form our own opinions. Please don't let big corporations take this away from us by controlling what news we hear. Why would you let a company that keeps filing for bankruptcy buy other companies. This is what keeps getting this country into financial trouble, with we the people, (the majority living a payday to payday existence), paying the larger price when government runs in to save these companies.
