Re: Order FCC 15-163 for ET Docket No. 13-49

In the matter of:

Revision of Part 15 of the Commission's rules to Permit Unlicensed National Information (U-NII)

The FCC Order 15-163 was extended from December 2, 2015 deadline to March 2, 2016 for the requirement that certain National Information Infrastructure (U-NII) devices must comply with FCC's revised Section 15.407 rules in order to be certified.

The certification deadline of 2nd March 2016 is here, but there has been no further updates to the Industry.

Also another important clarification we seek about:

"The Commission will respond to requests to postpone the June 2, 2016 cut-off on marketing and importation of the subject devices when it addresses the pending reconsideration petitions."

There has been no mention of change in deadline for old UNII compliant products marketed, manufactured, installed or imported after the June 2, 2016 transition deadline.

Fujitsu will find it extremely difficult to action this if the deadline for importation is not extended.

Hence, we request FCC to notify Fujitsu of the new UNII rule changes AND extend the importation deadline by at least 6 months.
