i have Direct tv. I feel that RFD channel is important because it keeps the rural communities connected with each other and helps us keep informed on markets and what is happening in other rural areas. there are no other channels dedicated to the rural way of life. I personally believe that it would be devastating to our farming community if it was removed from by any of the providers. also, if we are not given the channels we need to enrich our children with the rural values and the necessary education that has good solid value and morals, then I feel you need to remove a lot of other channels that have not educational value or show violence and low or nor morals. our country needs more channels like RFD. it helps our children and our community stay close to the ideals that made this country. and I do love this country. To remove RFD channel would do the rural citizens and the other people that may not live in a rural community the chance to see how things are done in the country. it is also education for anyone who takes the time to watch and enjoy the channel. It is educational and fun for our families. and it is family oriented. and at our house, if the kids can't watch it, no one watches it. I refuse to let filth enter my home. Most of the programing these days is full of immorality, violence and sex. these thing are not what built our country and made it great.
