We are requesting a waiver for an additional extension for invoice submission for FRN 2666501. A prior extension was used to fix issues with a old account number, a new account was created after a billing issue in Oct/Nov 2014 and the new billing account was unknown to AT&T's erate division for the processing of discounts from December - June of 2014. We the applicant receive SPI discounts so unaware of the lack of progress on the new account that was assumed to be accounted for in the 1st extension. We request an additional extension so that we can have AT&T submit SPI discounts for the new account.
