

60001524859.txt

Wion is our local AM Station. They keep us well informed on all activities happening in our small town. We are often overlooked by the BIG stations on either side of us but our local AM station keeps us in the loop.

For many of us that are just outside of the broadcast area when they power down at night it is hard to know about emergency alerts that may directly affect us as the nearest BIG station may be 40+ miles away and not even mention our area at all. Please help keep our AM Station strong and help them keep us safe.
