

February 29, 2016

Gentlemen:

I live in Ellijay, Georgia and would like to offer my support for the continuing programming of Larry's Country Diner on RFD TV on my local television Cable Company – ETC (Ellijay Telephone Company). My wife and I watch this excellent program as often as possible and also record it when we are away from home.

Without continued support from the FTC regarding programming of this type of television – that is not carried on the more traditional channels, we would not be able to watch not only our favorite television program (Larry's Country Diner) but also the educational programming that RFD TV also broadcasts including farming shows and regional shows.

Please do not let this type of programming disappear from the Cable choices available to the general population.

Respectively,

George S. Collins
