I currently have Comcast Cable. They carry RFD TV only on their most expensive package. As a result I have to pay an extra \$20 a month for 50 channels I don't want or watch just to get RFD. RFD has family friendly programming unlike the conglomerate networks that carry way to many trashy programs. This channel is great for seniors who don't like smut as well as children so we don't have to change the channel every time a different show comes on. Please don't allow Dish, Direct TV and Comcast along with the big cable networks to force this independent network off the air. It fills a need that isn't being provided by others. Thank you for helping viewers to have a voice.
