

RE: 16-41

RFD-TV should be available on all cable and satellite networks as a standard channel option ... i.e. no additional charges for the channel. It is a vital instrument providing news, weather, and entertainment to many 'middle American' seniors, ranchers, farmers and just plain traditional family folk. Please consider keeping RFD-TV available and at no additional charges on all distribution networks. So once again, please make RFD-TV and the support of rural and senior citizen programming the #1 issue for your consideration. Thank you.
