I have been watching RFD-TV since it came on the air. I love the rural programming and down to earth content.

The likes of At&T, Verizon, Comcast and others should not be allowed to discard good, wholesome content that is so loved by the citizens of this country.

Too many times, we have seen these media giants force their will on to the good people of America. I for one ask that you force Verizon and other like minded companies, to keep the RFD-TV networks on their program offerings.

it is time to stop corporate America's forcing unwanted programming on the public, while dropping good programming such as RFD-TV.
