We watch RFD-TV on Dish. This is the ONLY show that covers all aspects of the cattle business; the business we are in. We rely heavily on this program to keep us informed on state and national issues regarding our industry.

It seems to me that the large satellite companies would WAKE UP and remove programming that promotes violence; teen mommies; drugs, etc. No wonder America is in trouble, most kids only see these types of programming. Instead these companies should be flooding the airwaves with wholesome programming!!!

Please protect independent stations that are vital to AMERICA!
