We need RFD television for all ages, but especially those living in a rural areas, those involved in agricultural, and mature adults. I'm a horse lover and I love RFD. So many TV shows are not fit to watch. I watch RFD on DISH. A few years ago a satellite company called me wanting me to switch. I ask if they offered RFD; they replied no. I told them I was not interested. They offered to lower the rate some more, I again told them I was not interested. I did not switch.
