I watch RFD TV on Dish satellite system. Although I have do not have knowledge of Dish trying to remove RFD from its programming, I would really hate to see that happen. We watch RFD probably 35-40% of the time the TV is on. The rest is watching National Geographic, PBS, History Channels etc: We do watch some movies. It appears the people that feed the world are being directly targeted along with the seniors that enjoy this type programming. Please stop this type targeting of these type of channels.

Thank you,  
Respectfully,  
Cecil
