I watch RFD-TV and enjoy the programming very much. I was raised on a dairy farm and now live in a rural area of California. Though I am not directly involved in farming I like to keep up with the farming community and what the latest news and developments are. My entire family enjoys the programming, which is wholesome and has something to offer all of us. Please preserve RFD TV and do not allow it to be shut out.
Thank you very much,
Barry Olson
