This is really pretty simple. I am farmer trying as hard as I can to produce food, fuel and fiber by way of both row crops and forestry. At the same time I'm trying to raise a family and be a good steward of my land and a good citizen. I watch shows that are almost exclusively on RFDtv. I can not see how it's an option to not have these small stations that provide such valuable content helping us in the country provide for the entire nation.
