I watch RFD-TV on DirecTV. As a member of the agricultural community that grows food for our local community I am very disturbed about hearing that cable companies cutting these agricultural or outdoor based channels out of their programming. We watch this station frequently as it is one of the only channels that provides us with information about agricultural news and educational programs that relates to our business. Please keep these ag and outdoor channels. Farmers feed these urban areas that don't in particularly watch these stations, don't you want them to stay up to date and educated on technique's they are using to raise food to feed the majority of people in this country? Thank you for your time and consideration.
