I watch RFD-TV on Dish Network almost every day.

This is a very important channel to me and most of American Ag. The market day report, AG PhD, Successful farming, Ag daily shows are vital to get important information that is uniquely Ag.

Other programming is educational in telling the non Ag public about Ag.

We live in the sticks and this channel is vitally important to keep in touch with the rest of the Ag community.

We are less than 1% of the population, but we supply 100% of food and fiber for the us and export the rest around the world.

Please support this channel for us, the agriculture producers.

Thank you.

Bill Reinbold
