To Whom it May Concern :

I find it very disappointing and unAmerican for the FCC to interfere with my personal television viewing rights. As a citizen of this great and free country for which so many brave men and women have died to give us all this precious gift so many all around the world are dying for daily to have, I have the right to view programming that supports my Christian, family-oriented, moral, and agricultural views without interruption from you telling me what I can and cannot watch. I gave six years of my life in military service to this great country for you to take advantage of your freedoms, and now you are trying to take mine away. You should be ashamed and humiliated with your "Big Brother " outlook on making choices of what true American should and need to view. I pray in the future you will make better decisions pertaining to these types of choices to the American viewer.

A Very Disappointed Free American Citizen,  
Raymond Newell
